Career History

Gonoodle, Inc   May. 2023 – Oct. 2024

Web UI Developer

- As a Globant collaborator, I contributed to GoNoodle's mission by implementing new features and making improvements to their video application for children. This involved working primarily with Next.js and Tailwind to enhance the platform's performance, user experience, and responsiveness, ensuring an engaging and seamless experience for young users. Our team followed agile methodologies to deliver high-quality updates in a fast-paced environment.

Used Techs

NextJS	Tailwind CSS	TanStack Query

Mattel, Inc. US   Feb. 2023 – May. 2023

Web UI Developer

- As a Globant collaborator our team provided services to Mattel, Inc. One of the services that Globant offers to Mattel is support with Shopify and NextJS. This involves using their expertise in these technologies to assist Mattel with various tasks related to their online shop, such as building and maintaining the website, optimizing the user experience, and ensuring the site runs smoothly.

Used Techs

NextJS	BuilderIO	ContentStack CMS
Liquid Language Shopify		Jest Testing

TOTAL WINE & MORE, Orlando, US   Mar. 2022 – Dic. 2022
React Frontend Developer
- As a Glober collaborator, driven by an agile work methodology and the latest technologies, Total Wines And More, together with Globant's support, we are developing a new digital user experience platform to offer a superior service to all segments of its clients. The new, intuitive, personalized, and self-managed platform significantly changes the customer experience, representing another step in the cultural and digital transformation that retail is already experiencing.

Used Techs

React	Styled Components	Blomreach CMS	Bloomreach React SDK
Micro Frontend Patterns		LernaJS	Jenkins hooks
